

## Lantana Names Andrew Laing as Director of Information Analysis and Technology

Lantana Consulting Group is pleased to announce that Andrew Laing has joined as Director of Information Analysis and Technology. Laing comes to Lantana from the State of Vermont where he served as the Agency of Human Services Director of Business Architecture and later the state's first Chief Data Officer. Through integration, data platform, and data governance projects, Laing brought the state's data management, interoperability, and analytic capabilities to a higher level of maturity, leveraging his expertise and experience in systems engineering and enterprise architecture.

“I am excited to join the Lantana team,” says Laing. “Lantana is well known as an expert in health information exchange, reporting, and interchange standards, providing a level of service second to none. I am looking forward to contributing to Lantana as it helps clients capitalize on their data assets.”

“We gained tremendous respect for Andrew and his approach to systems architecture and problem solving during our work on Vermont’s statewide health information planning efforts,” added Lantana CEO, Liora Alschuler. “His skills and outlook are a great complement to our staff and we are excited about what we can do together.”

At Lantana, Andrew will be working primarily with state and private sector clients, reviewing how they acquire, incorporate, and use health information looking to improve business processes. Laing will be supported by Lantana’s deep bench of analysts, engineers, and clinical informaticists to design solutions that meet client’s evolving needs and user stories.

### About Lantana

Lantana Consulting Group provides services for standards-based health information exchange. Our solutions help clients with quality and public health reporting, data management, terminology mapping, and specification development.
